

Call for Papers

Articles from honorable speakers on firefighting, paramedics, safety, fire engineering and other related disciplines are invited. The following topics are listed as some of the examples for easy reference:

- Disaster Management
- Fire Engineering Approach
- Strategy for Cross-discipline Emergency Preparedness
- Fire Safety Management
- Health & Safety for Emergency Personnel
- Latest Development in Fire Safety Standards
- New Development in Fire and Ambulance Services
- Pre-hospital Emergency Care for Casualties

Deadline for receipt of synopses
30th June 2014

Notification to authors of acceptance
31st July 2014

All submissions should be sent to Fire Asia 2015 Conference Secretariat by e-mail or by mail.

Contact Us

Fire Asia 2015 Conference Secretariat
Contact person: Ms. Margaret MING
Tel: (852) 3101 9890
Fax: (852) 3101 9806
E-mail: secretariat@fireasia2015.org
Mailing Address:
Ming Focus Limited
Room 2710, 27/F, CC Wu Building,
302-308 Hennessy Road,
Wanchai, Hong Kong

Request Updates

Visit our official website at www.fireasia2015.org or provide the following contact information and send it to Fire Asia 2015 Conference Secretariat by fax or by e-mail for registration details and more updates of the Conference:

Preferred means of further communication:

☐ E-mail or ☐ Fax

Title : Prof./Dr./Ir./Mr./Ms./Others _____

Name : _____

Organization : _____

Job Title : _____

E-mail address : _____

(The following information is Optional)

Address : _____

Post Code/Zip Code: _____

Country : _____

Tel No. : () _____

Fax No. : () _____

Personal Information Collection (PIC) Statement:

The personal data ('the data') collected will be treated in confidence and not be disclosed to any other party. The data will be used for the purpose as mentioned in this publication and may be used to facilitate future communications between the provider of the data and organizers of 'Fire Asia', which include dissemination of information such as news and updates of the activities; promotion of products; distribution of newsletters; statistics compilation; and collect feedback, etc.

FIRE ASIA 2015
TEAM UP FOR FUTURE

3 - 6 February 2015
**Hong Kong Convention and
Exhibition Centre**

HKFE

Introduction

Asia. The largest, most populous continent of the world, with a sustained, robust economic growth where east meets west, traditionalism meets modernity, and, increasingly, prosperity meets a variety of underlying threats to life and property. In the past few years, the scale and quantity of infrastructures and mega building projects have soared in Asian nations, developed and emerging alike. With the emergence of these towering skyscrapers and lofty underground rendezvouses, the complexity of fire risks has amplified rampantly. Already, the advancement of architectural design and imposition of constraints in the development conditions have triggered great demands for innovative fire engineering design. With the ever-increasing population density in the region, on the other hand, comes also the grave concerns of the societies over the worsening vulnerability to infectious disease outbreaks and natural disasters.

A safer world cannot be built overnight. Time and again, experiences have aroused our vigilance on the need to advance with the times in reaching a new regime before crisis emerges. It is our aspiration to resolve all possible threats proactively and minimize the chance for loss of life and property. Related professionals must therefore fully equip themselves and work hand in hand for all these new challenges. In this technological era, we are also committed to keep enhancing our fire safety, paramedic response, emergency preparedness, fire engineering concepts and resilience to disaster.

Theme

With more than 20 years of history, the Fire Asia has become one of the most prominent events for fire safety practitioners, fire engineers, paramedics and emergency services to exchange ideas and get in touch with the latest trend in the profession.

The main theme of Fire Asia 2015 is "Team up for future". We foresee that the prevailing challenges require the collaboration of different professionals with different specialties to tackle. The focuses of Fire Asia 2015 are new fire-fighting and disaster recovery operation techniques; latest fire engineering researches; paramedics operations; and showcase studies for landmark projects. Participants would definitely seize this opportunity to catch up with the latest innovations and development, and expand their network in Asia and beyond, which will help foster a closer tie and cooperation among all disciplines in the profession.

At a Glance

Period: 3-6 February 2015
Venue: Hong Kong Convention
and Exhibition Centre
Official website: www.fireasia2015.org
Major Official Language: English

Details:

- Speeches by more than 20 internationally renowned speakers
- Technical visit to latest built environment
- and more communication / sharing platforms...

Organizers

The Institution of Fire Engineers (Hong Kong Branch)
The Hong Kong Institution of Engineers
(Building Services Division)
The Hong Kong Institution of Engineers (Fire Division)
Ambulance Service Institute (Hong Kong Branch)
China Hong Kong Fire Protection Association

Fully supported by:
Hong Kong Fire Services Department
